

Crypto Dashboard - CoinGecko API Guide

Introduction

This document contains the most important CoinGecko API endpoints you need to build a professional Crypto Dashboard project using frontend technologies.

1. Get All Coins (Market Data)

Fetch list of cryptocurrencies with prices, images, and changes.

```
https://api.coingecko.com/api/v3/coins/markets?vs_currency=usd
```

2. Get Single Coin Details

Fetch detailed information about a specific cryptocurrency.

```
https://api.coingecko.com/api/v3/coins/{id}  
Example:  
https://api.coingecko.com/api/v3/coins/bitcoin
```

3. Get Market Chart Data

Fetch price chart data for a coin.

```
https://api.coingecko.com/api/v3/coins/{id}/market_chart?vs_currency=usd&days=7
```

4. Search for Coins

Search cryptocurrencies by name.

```
https://api.coingecko.com/api/v3/search?query=bitcoin
```

5. Trending Coins

Get trending cryptocurrencies.

```
https://api.coingecko.com/api/v3/search/trending
```

Important Tips

- No API key required - Free to use - Be careful with rate limits - Use debounce for search - Cache data when possible
